BIBI Thought for the Week:

"There are two great rules of life, the one general and the other particular. The first is that everyone can, in the end, get what he wants if he only tries. This is the general rule. The particular rule is that every individual is more or less an exception to the general rule."

Samuel Butler, English author (1835 - 1902)

May 10, 1993

To the Editor:

As a concerned parent I feel the time has come to stand up and voice my opinion on the state of affairs at ISD. In the past couple of years we have seen great strides in creating a positive environment suitable for educating our Deaf children. The addition of several Deaf teachers and staff have provided not only multiple learning opportunities, both in and out of the classroom, but excellent role models for our children as well. Our children see that they can grow up to become teachers, social workers, counselors, and yes, even administrators. These role models have also given me, as a parent, great expectations, knowing that my children will have opportunities in the future to become whatever they choose.

Our children have a right to an education in the least restrictive environment. How much more restrictive can you get than a classroom where the teacher cannot fluently communicate in the language of the students.

I realize there are roles on campus for hearing people. We have some very qualified (hearing) professionals. We need them if we are to have a true bilingual/bicultural atmosphere. However, my stand must be in the best interests of my children. I intend to fight for their right to a restriction free learning environment.

I think it is time for us to take another look at our school's Mission Statement, make our decisions and set priorities based on the needs of those for whom this institution was established - DEAF CHILDREN!

Student Employee of the Week

Student Employee of the Week **Vernon McLin** can be seen downtown at the US Attorney's Office where he has worked as a Clerk since February. Vernon is thriving in this busy downtown office where his responsibilities include photocopying legal documents, running inter-departmental errands, and law library research. His initiative shines through as he manages to keep up with a heavy workload. Vernon's supervisor describes him as "a good worker and a big tease." She has many funny stories to share about his unique sense of humor, and reports that Vernon's co-workers enjoy working with him and were very excited when he offered to teach an ASL class. His students attend a 15 minute class twice a week, but the time often stretches to 30 minutes as they don't want to leave!

Flowers

The Student Employment Center staff is working on the flowers around campus, and is seeking donations of flowers from home gardens. "If you are separating plants and have run out of space, bundle up the extras in newspaper and we'll see that they are planted on campus," Center Director Donna Stutler said.

Health Facts - From the Files of ISD's Health Center

Goodbye to Chickenpox?

At a recent meeting of the American Academy of Pediatrics, two infectious disease specialists predicted that a vaccine against chickenpox will be available by the end of 1993. The varicella vaccine has been tested and on the verge of being licensed in the United States for several years, but production problems have kept it unavailable except to study groups. Vincent Fulginiti, MD, dean and professor of pediatrics at Tulane University School of Medicine in New Orleans, called the vaccine "a good vaccine for healthy children" which may be combined with the measles, mumps and rubella vaccine children currently receive. Studies have shown that only around 10% of children who get the vaccine are not entirely protected for the first several years after immunization, but many of those children develop only mild cases of chickenpox. Unfortunately, the vaccine has not been shown to be as effective in high-risk populations, such as those people with altered immunity, or persons who have diseases such as leukemia, HIV/AIDS, or Hodgkin's disease.

Currently, as we witness every year in school settings, this disease is easily passed to any person (when exposed) who has not previously had the disease. Chicken pox is spread by respiratory droplets (sneezes, etc.) from person to person and is highly contagious. Crowded areas such as stores, schools and churches are prime locations for transmission.
